The medium of wood with occasional metal or glass eyes is fashioned to represent birds with a concept of hunting decoys for waterfowl and shorebirds being a primary influence. Ice fishing decoys are also emulated. Walking sticks and canes are created as stylized mobility accoutrements.

 Art Social by RJ Orner

 artsocialrjo

Serendipity derives from art sessions with my niece in the breeze way of my parents home in the summers. I would leave Washington DC for a few weeks and come back to Iowa and my niece would join. Today that niece is an architect and she had the vision for Art Social and this studio. Bringing everything full circle.
